

Growth, Innovation and Leadership will augment next level of development in Asia Pacific businesses, says *Frost & Sullivan*

Singapore, September 23, 2010 – With this last global economic slump behind us, the business environment has become increasingly tougher, and the competition is greater. Now in its third year the **Growth, Innovation and Leadership Congress: *The Global Community of Growth Innovation and Leadership*** (GIL 2010: Asia Pacific) will focus on futuristic scenarios faced by the various industries and the opportunities for growth and innovation that these trends will bring about.

GIL 2010: Asia Pacific will be held in Singapore from **October 18-19, 2010** at the Resorts World Convention Centre, Sentosa.

Summarising the congress agenda, Manoj Menon, partner and managing director, for *Frost & Sullivan*, Asia Pacific, says, "Having emerged from a difficult economic situation just a year ago, we have seen a tremendous focus from the Asia Pacific region to create innovative and alternate business opportunities and ideas. The GIL APAC 2010 congress will add to these ideas and initiatives by show-casing key trends that will impact the region's business environment in the coming years."

This year's program will have a particular focus on the development of Smart Cities, Clean Technologies, Healthcare and Cloud Computing sectors. With an interactive agenda and combination of success stories, panel discussions, concurrent business tracks and analyst insights, the congress will explore, how smart cities will evolve, where the healthcare industry is heading, how cloud computing will impact IT sectors, and how clean technologies are enabling the development of sustainable energy and environment infrastructure.

Frost & Sullivan's flagship event, **GIL 2010: Asia Pacific - *The Global Community of Growth, Innovation and Leadership***, provides senior executives with a platform to network with industry luminaries and thought leaders exchanging proven best practices, tools and strategies to accelerate growth. Leveraging almost 50 years of experience, Frost & Sullivan delivers invaluable insight to clients to help them meet their growth objectives, through the development and implementation of a systematic process for growth.
