

Microsoft Power Platform Developer

Job Description

Location: Hongkong/ US Pennsylvania

Category: Fulltime

As a Power Platform Developer, you will be responsible for developing applications using Microsoft Power Platform components, such as Power Apps, Power Apps Portal, Power Automate, Power BI and Power Virtual Agents, among others.

You will also be able to provide architecture, configuration, administration, and functional support to expand capabilities in Power platform. Design end-to-end solutions that improve collaboration, productivity, and knowledge sharing. Identify areas and processes where Microsoft 365, Office 365, and SharePoint can be better leveraged and facilitate process improvement.

Job Responsibilities/ Accountabilities

- Extensive experience in the Microsoft Power Platform - MS PowerApps, MS Flow and PowerBI.
- Experience with API or rest services integrations to implement solutions with multiple data sources
- Extensive experience in the Microsoft SharePoint.
- PowerApps - Advanced knowledge of formulas and development methods.
- Power Apps - Responsible for developing model and canvas driven apps
- Applying Power Apps including an in-depth understanding of customization, configuration, integration, and extensibility, as well as boundaries and constraints
- Power BI - Be experienced in tools and systems on MS SQL Server BI Stack, Power Query, and DAX
- Power BI - Have knowledge of database fundamentals such as multidimensional database design, relational database design, star schema and more
- Power BI - Developing visual reports, KPI scorecards, and dashboards using Power BI desktop
- Power Automate - Ability to create custom connectors.
- Power Automate - Development of Azure logic apps and functions.
- Power Automate - Responsible for monitoring flows and optimizations.

Technical skills are important, but we also value soft skills and your motivation. Ability to work in a team while being a key contributor
